

Course:Building Planning and Design Using Computer aided Drawing & Design (BPDCADD)

Industry:Private Public Building

Address:Gadegaon road,Barshi

Report:

Third year students of civil engineering have visited Apartment building on Gadegaon road in Barshi on 18/09/2019. The visit is planned based on the university curriculum. The purpose of this visit was to get to know planning of building, details of various units, & understanding bye laws of building etc. The site engineer of the Apartment Er. SagarLondhe has guided the third year civil engineering student's throughout the visit. The building was consist of living room, kitchen, two bedrooms attached with bathrooms and toilets.

In addition to this at ground floor parking was provided, also balconies were provide to each bedroom. The importance of principles of planning of building such as aspects, prospects, privacy, roominess etc. are discussed during visit. Er. SagarLondhe guided students in terms of planning of building, practical difficulty, municipality bye laws and difference between bungalow and flat system.

The students come to know about planning of building in line with principle of building planning. Details of room sizes, furniture, electrification and sizes of columns, beam, floor etc. are noted by students. The visit was helpful to the student while deciding sizes of various elements of buildings and also planning of various units of building based on the principles of planning of building. At the end of visit Mr. YashwantShette, TE Student (Visit Coordinator) given vote of thanks.
